

Sharpen Your Edge!

No two airports are exactly the same! Furthermore, when a non-towered airport is located in close proximity to controlled airspace, pilots must be familiar with airspace boundaries, communications procedures as well as any other special considerations that may apply. At this exclusive briefing, the FAA Safety Team and the Buffalo Air Traffic Control Tower have teamed up to refresh your knowledge and understanding of the best practices when operating at non-towered airports and those located near Buffalo's Class C airspace. All area pilots are encouraged to attend and share their questions! Don't miss it, click on the link below to register today! Seating is very limited and we ask that you PLEASE BRING A LAWN CHAIR to ensure your personal comfort! Sponsored by the Buffalo-Lancaster Airport.

Directions: Meeting in the large hangar.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
Sign up for the FAA's safety services at www.FAASafety.gov!
